# SETTING GLOBAL BENCHMARKS IN MANUFACTURING

Ever since its inception in 1964, Polycab has been relentlessly innovating to make lives easier and safer. Driven by an unwavering commitment to quality and delighting consumers, Polycab has evolved from being India's largest wires and cable manufacturer to becoming one of the country's leading end-to-end electrical solutions brands.

Polycab fans are meticulously designed for aspiring consumers and come in an extensive portfolio that includes ceiling fans, table fans, wall fans, exhaust fans and farrata fans. Polycab Fans are manufactured in one of the largest fan factories in Roorkee, Uttarakhand with every process taking place under one roof. Check out our meticulous manufacturing processes that ensure customers get the highest quality products for years to come.

## Automated Copper Winding

The copper winding process is entirely automated and guarantees perfection. Each heavy duty winding uses 99.999% pure copper; thus making it the best in the industry.

## Automatic Robotic Paint Shop (imported from Switzerland)

The robotic paint shop, sourced from ITWGEMA, Switzerland coats the various fan parts in a uniform, precise manner. A wide choice of colours followed by a high grade laminated cover to protect the surface complete the in-house painting process.

## In-house Automatic Air-Delivery Testing Lab

Each and every finished product is tested in a specifically designed, in-house Automatic Air-Delivery Testing Lab for air delivery and distribution capacity. Polycab fan's superior air delivery between 225 CMM to 260 CMM will rejuvenate every person in the room with a gust of refreshing breeze.

## Perfect dimensions with CNC Machine

The fan's blades along with top and bottom cover are built using high quality aluminium on a dedicated assembly line. CNC machines are used to ensure perfect dimensions. The precise optimum angle of the fan blades creates higher air velocity and distributes air evenly.

## Inhouse BLDC Fan manufacturing unit at Roorkee

Polycab has gained the expertise of manufacturing BLDC Fans inhouse in our specialised plant in Roorkee.

All our BLDC fans models are manufactured inhouse considering utmost quality and durability

## Inhouse Fan Electronics manufacturing unit at Halol

Polycab has undergone backward integration and developed its fans electronics facility in Halol. This helps Polycab built complete control on the electronics and cuts down its dependency on other vendors for PCB circuitries.

# BLDC CEILING FANS

## SERIES

A royal range of premium fans with cutting-edge designs and Advanced BLDC Technology that ensure superior air flow.

# SILENCIO CRUISER PRIME BLDC

# ZOOMER PRIME BLDC

NEW

Sweep Size 1200mm

Sweep (MM)	Speed (RPM)	Power Input (W)	Air Delivery (CMM)
1200	370	32	225

The beautiful premium finish makes this fan seem like a decor element, adding quiet panache to your room.

- HIGHER AIR FLOW WITH BROAD BLADE DESIGN
- 100% COPPER WINDING BLDC MOTOR
- HIGH SPEED OPERATIONS
- RUST-PROOF ALUMINIUM BLADES
- RF POINT ANYWHERE REMOTE
- BUILT IN VOLTAGE STABILIZATION
- REVERSE ROTATION MODE

## 25 SPEED SETTINGS

Increase or decrease the speed accurately, according to your comfort

## BOOST ++ MODE

One button press for full speed and maximum airflow

## FORWARD ROTATION

The fan starts rotating in forward direction for powerful airflow

## BEEP SOUND

The beep confirms that the remote control has registered the button press

## SLEEP MODE

An energy saving mode where the fan reduces speed every one hour, and continues working at its lowest speed

## MULTI-FAN PAIRING

Control multiple fans simultaneously

## BREEZE MODE

Experience the feeling of natural breeze simulated by the fan alternating between low to high speed rapidly, mimicking the outdoors

## REVERSE ROTATION

The fan starts rotating in reverse direction to circulate air gently without a blast

Experience energy-efficient comfort  
with Advanced BLDC Technology.
